

Qualification

University of Waterloo, 2008. B. Arch. Studies, with Distinction
Candidate for M.Arch
OAA Student Associate

Recognition

University of Waterloo Graduate Scholarship, 2009
University of Toronto Admission Fellowship, 2009 (declined)
Highest Academic Standing, Spring 2008

Arsenal

Mac and PC; AutoCAD, SketchUp, Artlantis; Photoshop,
Illustrator, InDesign, Flash, Dreamweaver; Final Cut Pro

Abstract

Interests include individuality and the built environment,
housing typologies, patterns of living, branding and
marketing in architecture, and the creative economy.

Giannone Petricone Associates, Toronto 2008-2009

Focused primarily on working drawings and presentation
material, with an opportunity to develop design on smaller
projects.

- Worked on the renovation of a 10,000 sf villa near Rome,
Italy; was involved in design, working drawing set, and
specification.
- Part of design team for the Swarovski® Crystallized™
booth at IDS09, and responsible for promotional imagery
and video; this reprised the renderings I created for the
Ciot booth at IDS08, published by the Globe & Mail.
- Involved in the design development of the community
centre for the critically acclaimed Shops at Don Mills.
- Created schematic design packages for several medium-
density residential projects in downtown Toronto.

W x Y Architecture and Urban Design, New York 2007

The small size of the office provided me with exposure
to a wide variety of projects and tasks, from residential
renovations to a public and institutional work, and from
schematic design to construction documents.

- Involved in the schematic design for a 16-storey hotel in
the up-and-coming Hudson Square neighbourhood of
Manhattan.
- Worked on the design development of a school in New
Jersey for autistic children; in addition, created a short film
for a successful fundraising effort.
- Worked closely with a partner in the design and
construction of a loft renovation in the Flatiron District.
- Prepared construction drawings for the Hudson River
Park project.

Proscenium Architecture + Interiors, Vancouver 2006

Focused primarily on the design development of significant

institutional projects, developing the confidence to work
independently.

- Involved in the design development of the new School
of Contemporary Arts and the Vancouver East Cultural
Centre; constructed models for presentation and the
design review panel.
- Created a development permit set for an apartment lobby
renovation in Burnaby, BC.

Kuwabara Payne McKenna Blumberg Architects, Toronto 2005

Gained valuable experience with the LEED system,
large-scale, government-funded projects, and fast-track
construction while working on the 65 000 m² Manitoba
Hydro project in Winnipeg, MB, Canada.

- Built and updated models for design development and
presentation
- Drew details of innovative double-skin curtain wall for
tender package.

Spitzer & Associates Architects, New York

As part of a team of three (including the design principal)
assigned to an apartment renovation in the Upper East Side, I
quickly learned about building in New York and was integrally
involved in the project.

- Drew construction drawings and assembled permit sets.
- Made site visits for coordination and survey.
